And cost effectiveness is another critical consideration not only in design and execution, but also in problem solving, programming and client service in itself. With our progressive approach we are able to handle all Building Services, from research and feasibility studies through cost effective design, to commissioning and regulatory responsibilities.

The SPP Group's team have extensive experience in the design documentation and construction of infrastructure and building services for specialist use buildings such as defence facilities, incorporating varying methods of procurement.

The SPP Group believe in encouraging staff on all levels to contribute to the effectiveness of the company by nurturing their input and endorsing their interest in further studies, and industry committees. This helps to maintain pride and commitment from employees, which is inevitably transferred to you, our valued Client.

Our teams provide an unequalled level of service on projects of technical difficulty, paying particular attention to our client needs which is the hallmark of SPP Group's approach.
